

PRAVEEN MUTHUTHANTHIRIGE

STUDENT FULL STACK DEVELOPER

ABOUT ME

I'm a self-motivated and highly inquisitive individual with a financial background turned full stack web developer. I'm generally fascinated about the transformative nature of technology, specifically by all things web, cloud, Blockchain/DLT & the strategies behind successful software businesses.

INTERESTS

Culture

K-Pop

Food

Travel

EXPERIENCE

CODER ACADEMY - FULL STACK WEB

Bootcamp Student

Feb 2019 - Aug 2019

- Developed a functional two-way "app store" marketplace in Rails utilising the MVC architectural pattern with PostgreSQL as the RDBMS, Bootstrap for the front-end, LucidChart for ERD sketching and Heroku for deployment.
- Designed application routes utilising modern RESTful standards to allow for efficient CRUD.
- The application was developed through pair programming and kanban (Trello) for task management.
- Integrated 3rd party APIs for full payment functionality and asset storage in Amazon S3.

THE INTENTIONAL TRADER

Technical Specialist

2016-2018

- Managed the entire technical support desk consisting of responding to 440 tickets per month with an exceptional 94% customer rate.
- Successfully spearheaded a proposal to transition our customer support solutions to Zendesk. Outlined the benefits of reduced costs, faster response times and detailed customer metrics leading to consistently positive customer reviews.
- Responsible for the maintenance of front-ends located at MarketReplayData.com & TheIntentionalTrader.com. Managed the Infrastructure requirements of the business.
